

ATTENDING TO WOMEN'S WOES

WITH A WEALTH OF EXPERIENCE, OBSTETRICS AND GYNAECOLOGY (O&G) SPECIALIST DR SEE THO KAI YIN HAS HELPED AND TREATED MANY WOMEN WHO HAVE PROBLEMS WITH THEIR REPRODUCTIVE ORGANS.

In 1969, Dr See Tho graduated with an MBBS (Bachelor of Medicine, Bachelor of Surgery) from the University of Singapore, and subsequently obtained the MRCOG (Member, Royal College of Obstetricians and Gynaecologists) in 1974. He was conferred Fellowship of the Academy Medicine from the Royal College of Obstetrics and Gynaecologists three years later. The skilled doctor set up his own clinic in 1978, and has been practising at Gleneagles Medical Centre since 1990.

Apart from general O&G, Dr See Tho maintains an active interest in the laparoscopic management of fibroids, ovarian tumours, endometriosis, early-stage cancers and other benign conditions of the female reproductive system, such as chronic infections and ectopic pregnancies. In addition, he has vast experience in the surgical treatment of

urinary incontinence and utero-vaginal prolapse.

Effectively bilingual in English and Mandarin, Dr See Tho is an expert in minimally invasive procedures for gynaecological conditions. He formerly served as the president of the Obstetrical & Gynaecological Society of Singapore (OGSS), and now mentors younger gynaecologists in private practice. Currently, he is also a visiting consultant to the Department of Obstetrics and Gynaecology at the National University of Singapore. At the same time, he is a member of the American Association of Gynecologic Laparoscopists (AAGL).

HELP IS HERE

Besides general gynaecological screening and treatment, The See Tho Clinic For Women provides a host of specialised services:

Hysteroscopic procedures

- Diagnostic hysteroscopy for investigation of abnormal uterine bleeding and infertility
- Operative hysteroscopy for conservative treatment of abnormal uterine bleeding of benign origin
- Hysteroscopic resection of endometrium/myoma (TCRE/TCRM), thermal choice balloon ablation, microwave endometrial ablation (MEA)

Laparoscopic procedures

- Diagnostic laparoscopy for infertility, pelvic pain and tumours
- Operative laparoscopy for pelvic tumors (laparoscopic myomectomy, ovarian cystectomy/oophorectomy, resection of pelvic endometriosis)
- Total laparoscopic hysterectomy for management of benign diseases of the female reproduction system
